Facilitation of international movement of competition horses

PERSPECTIVES

DOSSIER

AROUND THE WORLD

The [International Equestrian Federation \(FEI\)](#) is developing a system that enables real-time traceability of horses. Based on a combination of a microchip, microchip reader and smartphone app, this system will send information on registered users, horses, times and locations to the FEI database. Animal health information will also be recorded and, as a first step, a procedure for registering vaccinations against equine influenza vaccination will be developed. The system is also intended to register the movements of [high health, high performance horses](#). The launch of this system is planned for 2020.

AROUND THE WORLD

► NETWORK INITIATIVES

FEI multipurpose electronic system for real-time traceability

KEYWORDS

#competition horse, #International Equestrian Federation (FEI), #traceability.
