EXPERT REPORTS

ANIMAL HEALTH

Kyrgyzstan was officially recognised as an African horse sickness (AHS)-free country by the OIE in 2017.

Following a mission conducted in Kyrgyzstan in April 2018 to monitor compliance with the *Terrestrial Animal Health Code* provisions for the maintenance of its AHS-free country status, [this status is suspended with effect from 22 May 2018](#).

According to the [Standard Operating Procedure \(SOP\) for the suspension of an officially recognised disease status](#), the country has two years to recover its previously recognised status by complying with the relevant requirements of the *Terrestrial Animal Health Code*.
